NEUROMARK[®] device may be used in patients with recurring stuffy and/or runny nose. Your physician will need to determine if your condition is one that may benefit from NEUROMARK. Possible side effects include but are not limited to post-operative bleeding, pain or discomfort, allergic reaction to anesthesia or other medication administered during the procedure, and infection. Your condition may not respond to the treatment. To learn more about this procedure and potential risks, ask your physician.

INDICATIONS FOR USE: The NEUROMARK[®] System is indicated for use in otorhinolaryngology (ENT) surgery for creation of radiofrequency (RF) lesions to disrupt posterior nasal nerves in patients with chronic rhinitis. Most common side effects associated with the NEUROMARK device include infection, bleeding, and temporary pain or discomfort.

Please see Instructions for Use (IFU) for a complete listing of warnings, precautions, and adverse events.

 $\ensuremath{\textbf{CAUTION:}}$ Federal (USA) law restricts this device to sale by or on the order of a physician.

Are you suffering from chronic rhinitis? Ditch the tissues and get on with your day.

A gentle procedure for chronic rhinitis.

If you have been living with the annoyance, anxiety, or embarrassment of your chronic rhinitis symptoms, you are not alone.

1 in 4 American adults suffer from chronic rhinitis¹

What causes chronic rhinitis?

For many patients, chronic rhinitis is caused by **overactive posterior nasal nerves** that put mucus production into overdrive.

Posterior nasal nerves

Common symptoms of chronic rhinitis:

- Runny nose
- Persistent post-nasal drip that leads to clearing of throat, coughing, or an "itchy throat"
- Frequent "stuffed up" feeling
- Excessive sneezing

Ready to ditch the tissues?

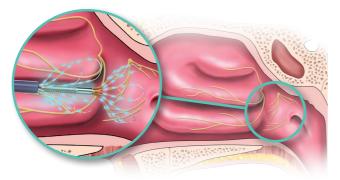

Here's the good news!

Advanced treatment options are now available that can help you find clinically meaningful relief so you can breathe better and live life to the fullest.

What is NEUROMARK[®]?

NEUROMARK is a gentle procedure to treat the source of your chronic rhinitis. The treatment is safe, clinically proven, and minimally invasive.^{2,3}

NEUROMARK uses low-power energy to disrupt overactive posterior nasal nerves, the source of chronic rhinitis.⁴

How is NEUROMARK different from other treatments?

Medication	NEUROMARK	Surgery	
 Temporary relief of symptoms⁵ Non-invasive Does not address overactive nasal nerves 	 May provide long-term relief Gentle and minimally invasive Available in-office 	 May provide long-term relief Invasive Long recovery time 	

Breathing better means feeling better.

CLARITY Clinical Study Data³:

After the NEUROMARK procedure, patients experienced significant reduction in nasal congestion, runny nose, nasal itching, and sneezing³

No serious adverse events or intense "ice-cream headaches" were reported after the NEUROMARK procedure³

Don't worry. Breathe happy.

After a single NEUROMARK treatment, you can get right back to your regular day-and on the road to better breathing.²

May be performed in your doctor's office

Requires only local anesthesia

Total appointment time is usually an hour or less

*Individual results may vary

Typically, there is no downtime and patients can return to their regular day*

In the CLARITY Clinical Study, nearly 9 out of 10 patients reported clinically meaningful improvement in quality of life measures after their NEUROMARK procedure.³

"The NEUROMARK procedure was very comfortable-not at all painful or disruptive. My symptoms improved over time, and today they are reduced at least 95%."[†]

- David B., NEUROMARK patient

[†]Testimonial reflects user experience and opinion of an actual patient. Individual results may vary.
